STATINTL

STATINTL

P-6328

June 21, 1966

Gentlemen:

At your request we are proposing to supply maintenance spares to support two of the 758 systems. It is anticipated that these spares will make the system self-sufficient for at least six months.

STATINTL
An additional preflight checkout and maintenance cart is included to support both systems when deployed at two different sites. The additional cart will not be furnished with a set of test antennas (since the antennas were custom designed for the first aircraft but not the second) or

One of the two Equipment Test Sets, Item 660, which was furnished with the first cart will be consigned to the second cart. This will slightly degrade flexibility while testing subsystems but is worth the cost savings.

STATINTL
Associated with the material costs estimated on the attachment, there are labor costs, other direct charges and burden which cover specifying, ordering, assembling, packing and shipping. The total budgetary estimate for supplying these spare parts and test cart if

A list of GFE equipment is appended to this proposal. This GFE will be needed to equip the additional cart as well as provide a set of recorders for the second airborne system. The cost of the GFE is not part of the budgetary price.

Please advise the undersigned if there are any questions or additional information required.

Very truly yours,

STATINTL
